BEFORE YOU PAY FOR COMMERCIAL KITCHEN EQUIPMENT, CHECK THESE 5 THINGS. THE CHEAPEST QUOTE IS RARELY THE CHEAPEST.

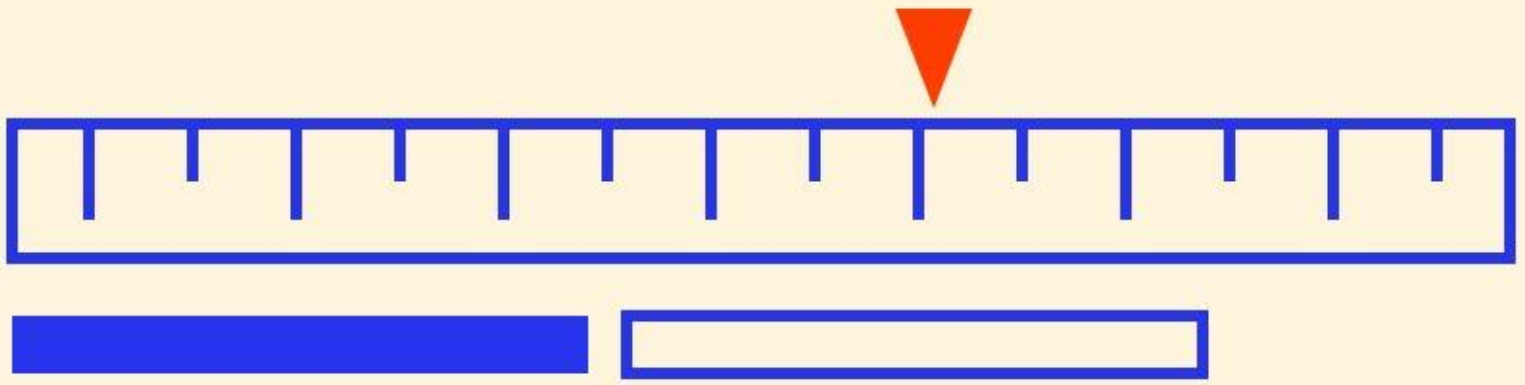

SWIPE FOR THE 5-POINT CHECK BEFORE YOU SIGN ANYTHING

01.

SIZE IT FOR YOUR PEAK HOUR

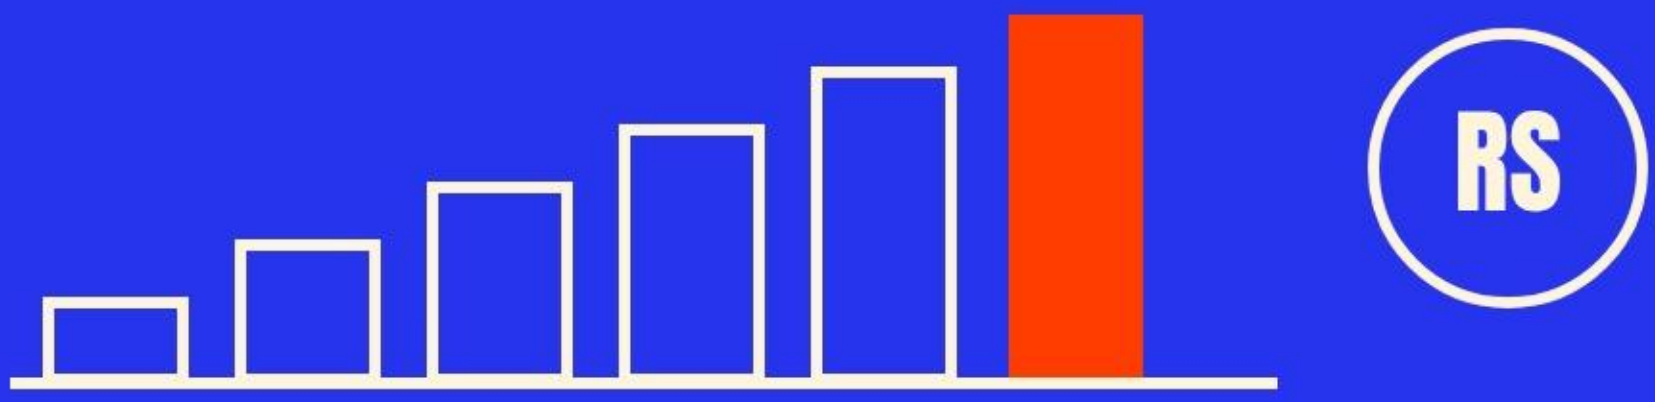

Check rated capacity against your busiest service, not an average day. Too small chokes the line. Too big wastes power and space.

02.

COMPARE RUNNING COST, NOT JUST PRICE

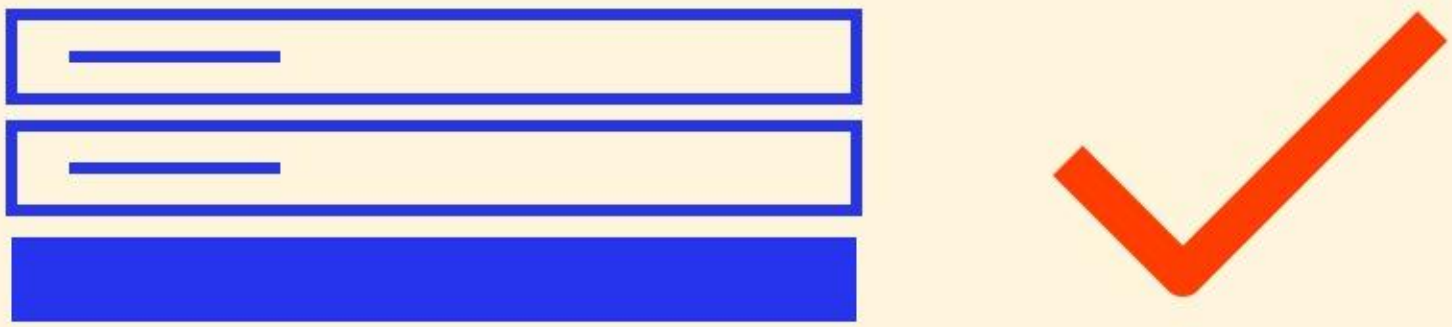

Ask for power or gas consumption. A lower price can cost more every month the machine runs.

03.

CHECK THE BUILD AND MATERIAL

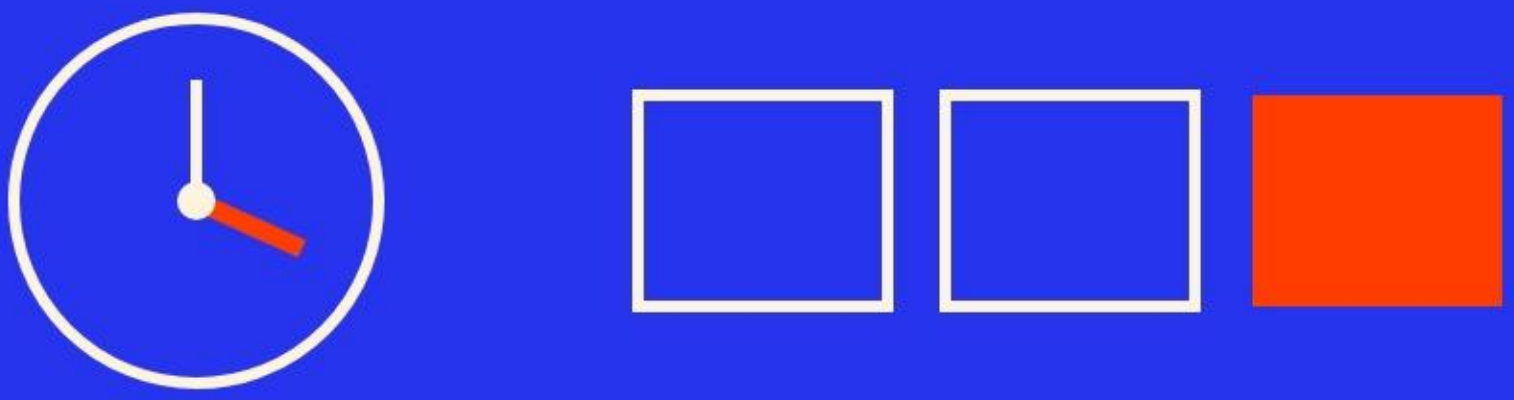

Food-contact surfaces should be food-grade and easy to clean. Ask which grade of stainless steel is used, and get it in writing.

04

ASK WHO SERVICES IT IN YOUR CITY

Get warranty terms, spare-parts availability and service response time before you buy.

05

PLAN SPACE, POWER AND EXHAUST FIRST

Match footprint, power load, gas, water and ventilation needs to your layout. Confirm who handles installation.

ALWAYS GET 3 QUOTES

On identical specs, with installation, warranty and service terms written down.

COMPARE EQUIPMENT QUOTES BEFORE YOU BUY.
